

Women In Computing

THE WOMEN IN COMPUTING CLUB AIMS TO INCREASE THE RETENTION, COMPETENCE, AND CONFIDENCE IN WOMEN STUDYING TECHNOLOGY AT CALVIN UNIVERSITY, BY CREATING A SENSE OF BELONGING AND PROVIDING OPPORTUNITIES TO NETWORK AND DEVELOP NEW SKILLS.

OUR STANCE. We firmly stand with the Black Lives Matter movement and the importance of diversity and inclusion. Our club caters to women—a gender minority in the tech field—and we are well aware of the under-representation and discrimination of all racial minorities in STEM. We strive to affirm the importance of diversity by providing opportunities for women of all colors to meet, network, and to address their challenges and triumphs.

SUPPORT FROM CALVIN. With the lack of women and diversity in the technology field, it makes having minority role models, in high-up positions, increasingly difficult. While we admire and appreciate the hard work Calvin's Computer Science Department does to provide us with a quality education, we would like to see more diversity amongst our professors.
